# Developer Assessment

1 HELLO

Thank you for your interest in working with us here at Spiralyze. In order for us to get an idea of what it would be like to work together, we have composed this development exercise. Just like any other assessment, do your best, show us what you can do, and don't stress. We're all friends here.

2 TASK

You are to develop one page, according to the mock up provided, to the best of your ability. The page you develop should be as close to a carbon copy of the mock up as possible. Start from the top of the page and work your way down within the time allotted. You will be provided with font files, copy text, image slices, PSDs (if you have Photoshop), and a jpeg of the mock-up to help you complete this task. The webpage needs to be responsive from 2000px wide down to 320px wide. We will only be providing you with a desktop mock-up, so use your judgement to determine how the design should be laid out on smaller devices.

Buttons (jpeg in Final Mock-Up folder for reference):

- Insert a hover state of your choice
- The "flip" button needs to flip the "Customize Your Moments" paragraph and the bike riding computer so that on click the computer is on the right and the paragraph is on the left. If the button is clicked a second time, the paragraph and computer should return to their original position
- The "change" button needs to replace the smiling couple in computer2.jpg with the smiling couple computer2b.jpg. This button should be able to toggle between the two images.

Time counts. Complete the page to the best of your ability; however, be mindful of how you're managing your time. The test is meant to give us an idea of your capabilities. For

that reason, some aspects of the design are harder to accomplish than others, so be sure to do what you can.

---

3 SUBMISSION

Submit your assessment based on the instructions in the email which sent you these directions. Upon receiving your email, we will review your submission. Once your webpage has been looked over, we will reach out again to discuss the next course of action.
